DIGITIZE HUB · REVISION CHECK

Website review items, checked against the live build

This document maps every numbered issue in Suleman Lakhani's 16 Oct 2026 review of digitizehub.vercel.app to what is now in the site. Layout, animation, and mobile were out of that review's scope and are out of this check's scope too.

SOURCE REVIEW

CHECK DATE
17 Oct 2026

SITE CHECKED
Local build of digitizehub-foundation (localhost:3000)

PAGES COVERED
Home, About, Services, five service pages, Portfolio, Pricing, Blog, Contact, FAQ, Privacy, Terms

29	10	0
Done in the current build	Done as far as code allows — owner still needed	Left unaddressed

Nothing from the 39-item list was ignored. Where a dollar price, Clutch profile, local phone number, or client name did not exist, the site was made honest instead of faked. Those rows are marked **Needs you**.

Critical — items 1 to 6

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
1	Privacy and Terms 404. Footer links broken while forms collect personal data.	DONE	/privacy and /terms both render. Footer links work. Unique titles: "Privacy Policy — Digitize Hub" and "Terms and Conditions — Digitize Hub". Contact email in both docs is info@digitizehub.net.
2	Pricing page has no prices. Headline says "Here they are," then cards show Silver / Gold / Platinum instead of an amount.	DONE	Headline no longer says "Here they are." Cards show "Quoted in writing / Fixed quote" and Custom shows "Scoped to you / Custom quote." Home pricing matches. No CAD dollar figures were invented — there is no approved price list. Add real amounts here when you have them.
3	FAQ placeholder: "Our websites start at [Price] CAD."	DONE	Removed. Home and FAQ now say pricing is quoted in writing, in CAD, after one call. No [Price] string remains in the app.
4	Only testimonial is "Sarah Williams, CEO – XYZ Company."	DONE	XYZ Company is gone. Remaining invented quotes are hidden (SHOW_TESTIMONIALS = false) until named client quotes are approved. Restore from the GUIDED comment in Testimonials.tsx.
5	About promises proof it does not have: Trustpilot/Clutch unlinked, 200+ / 6 years / 99% unsupported, enterprise claim.	DONE	Trustpilot, Clutch, and Google badges are hidden until live profile URLs exist. "200+", "6 years", and "99%" are gone. About hero is now "Calgary and Atlanta. Two countries, one team." Stats are 2 offices, 5 services, 1 written quote. Enterprise wording removed.

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
6	~17 named people on Home/About with no role or company (stock-photo wall).	DONE	TeamShowcase is commented out on Home and About. Restore when real team photos and names are ready.

🟠 Lead conversion and trust — items 7 to 14

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
7	"Book a Call" goes to the contact form, not a calendar.	DONE	Buttons renamed to "Request a Call". Custom plan uses "Get a Quote". No Calendly/Cal.com was added because none was provided. Wire a calendar later if you want real booking.
8	No WhatsApp button.	DONE	Floating WhatsApp chat plus footer link. Number: +1 (646) 580-7135. wa.me/16465807135.
9	Both offices share a 929 NY number; "always in your time zone" claim.	DONE	Number is now +1 (646) 580-7135 on both offices (the live WhatsApp number). Time-zone claim removed. Local Calgary/Atlanta numbers still needed if you want city-specific lines.
10	All social icons link to "#".	DONE	Facebook and Pinterest removed. Instagram → instagram.com/digitizehubllc. LinkedIn → linkedin.com/company/digitize-hub.
11	No real person shown. Site promises "one person to call."	DONE	Founders on Home and About: Raheel Karim and Tajdin Modi, with photos and LinkedIn. Copy: you talk to the people doing the work; reply within one business day.
12	Case studies are fake links. Same three projects; SEO/SMM show design work with no metrics.	NEEDS YOU	Arrows now link to /portfolio. We did not invent rankings, traffic, or lead numbers. Replace these cards with real case studies (client, industry, result) when you have them.
13	Portfolio is 67 untitled images; copy claims each project was built to generate leads.	NEEDS YOU	Lead-generation overclaim removed. Hero copy is now "Websites, branding, logos, social creatives, and mobile apps built for businesses across Canada and the USA." Image labels are still generic because client names were not supplied. Add names, industries, and results when you can.
14	Calgary address may be residential. Add registered Canadian business name to the footer.	NEEDS YOU	Footer now reads "Digitize Hub · Calgary, Alberta and Atlanta." Address kept as listed (21 Panorama Hills Gdns NW). We did not invent a legal entity name or corporation number. Confirm the registered name and whether the map pin is the office you want leads to see.

🟡 Logical inconsistencies — items 15 to 24

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
15	Site reads as design-only, while ads and FAQ sell	NEEDS YOU	Service copy now says we design and can build/launch (Figma plus implementation). FAQ mentions React Native/Flutter. No separate Web

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
	development.		Development / App Development / Hosting pages were added. Create those pages if you want them as distinct offers.
16	Project-run steps total 5–9 weeks; FAQ says 3–6 weeks.	DONE	Steps now: Research 2–3 days, Strategy 2–3 days, Content and Design 1–2 weeks, Development 1–2 weeks, Testing 2–4 days, Maintenance optional. That sits inside the 3–6 week website FAQ.
17	“Calgary and Georgia” vs “Calgary and Atlanta”; address is Marietta.	DONE	Wording is Calgary and Atlanta everywhere. Office card still shows the Marietta street address, which is the Atlanta office.
18	Market jumps between Canada/USA, worldwide, UK/UAE/SE Asia, and “Company in USA.”	DONE	Market is Canada and the USA. UI/UX heading is “Company in Canada & the USA.” Duplicate worldwide FAQ removed.
19	Ownership vs managed hosting unclear.	DONE	FAQ: you own code, files, and domain. Hosting can sit on your account, or we run it for a monthly fee; you can take it elsewhere. Lifecycle: Maintain is optional and billed separately.
20	SEO, Social, and Branding FAQs were the UI/UX FAQ copy-pasted.	DONE	Each slug has its own FAQ (branding concepts/ownership, social platforms/ads, SEO rankings/timeline). Shared close questions are only “do you implement” and market.
21	Forms disagree on budget, currency, services, and “how did you hear about us.”	DONE	Both forms use CAD $2,000–$5,000 / $5,000–$10,000 / $10,000+. Services include Branding and Social Media Marketing. Hear-about list is the same: Google, Social, Referral, LinkedIn, Other.
22	Custom plan says “Start Now.”	DONE	Custom CTA is “Get a Quote.” Launch and Growth are “Request a Call.”
23	Lifecycle has 4 steps, Services has 5 (Maintain). Social omits TikTok.	DONE	Lifecycle is Design, Build, Deploy, Rank, Maintain. Social copy and FAQ include TikTok.
24	FAQ asks the same outside-market question twice.	DONE	One question remains: “Do you work outside Calgary and Atlanta?” Answer covers Canada and the USA. The duplicate worldwide question is gone.

🔵 Content and copy — items 25 to 31

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
25	Hero tags: “Saas / Apps / Web 3.0.”	DONE	Tags are now SaaS, Apps, Websites. Web 3.0 is gone.
26	Missing spaces: “search rankingsfor,” “6 years,at,” “onthe Home Screen,” “UI & UXDesign,” “DesignCompany.”	DONE	Those concatenations are gone in copy. Service metadata titles now join segments with spaces (e.g. “Branding & Logo Design Services”).
27	About “How We Work” rendered 02–04 twice.	DONE	Four unique items: Fixed Price Promise, One Team End to End, Honest Recommendations, You Own the Work. Mobile

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
			and desktop use separate markup (hidden per breakpoint), not duplicated data.
28	Tagline “One team from first sketch…” overused as four subheads.	DONE	That line is no longer used as a repeating subhead. Sections have their own subheads.
29	Blog looks fake: same date, same tags, no author, cards may not link.	DONE	Dates: 12 Mar, 8 Apr, 20 May 2026. Author: Digitize Hub. Tags match the topic. Cards link to /blog/[slug] and posts render.
30	Mixed “colour”/“optimization”, “DigitizeHub”/“Digitize Hub”, footer “FAQ’s”.	DONE	Footer is “FAQs.” Body copy uses “Digitize Hub.” Logo alt still says DigitizeHub because that is the lockup. Canadian “colour” kept in branding; “optimization” kept for SEO. That mix is intentional, not a leftover FAQ’s typo.
31	Every process step used the same rocket icon.	DONE	Steps now use star, growth, custom, rocket-tilted, tick, and rocket.

⚙ SEO and technical — items 32 to 39

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
32	Every page had the same title and meta description.	DONE	Root title template is “%s — Digitize Hub.” About, Services, Pricing, Blog, Contact, FAQ, Privacy, Terms, and each service slug have their own title and description. Home keeps the default.
33	Footer tel:++1929… (double plus).	DONE	Footer and office cards use tel:+16465807135. Display number is +1 (646) 580-7135.
34	Branding-logo-design.mp4 vs branding-logo-design.mp4 (case-sensitive on Vercel).	DONE	All branding video paths use /videos/Branding-logo-design.mp4 (the file that exists).
35	Video path with a space: /videos/Social Media.mp4.	DONE	Site loads /videos/social-media.mp4.
36	Finovate/Orbitly and Packsy/Routely reused the same videos.	NEEDS YOU	Each of the five featured projects now points at a different existing file. This is not unique client footage. Swap in real project videos when you have them.
37	Heavy site: 3840px images, many autoplay videos, name wall ×4. Run PageSpeed.	NEEDS YOU	Next image deviceSizes capped at 1920px. Name wall removed. Gallery videos preload metadata, not auto. PageSpeed Insights was not run against production — do that on digitizehub.net before launch.
38	When moving to digitizehub.net, set canonicals and noindex vercel.app.	DONE	metadataBase is https://digitizehub.net. Sitemap points there. If production host is *.vercel.app, robots.txt disallows all. proxy.ts sets X-Robots-Tag: noindex, nofollow on *.vercel.app. Confirm after the custom domain is attached.

#	ORIGINAL ISSUE	STATUS	WHAT WE DID
39	Forms untested. Leads should land in CRM.	NEEDS YOU	Contact form posts to Formsubmit (info@digitizehub.net). A local test submit returned “Thanks. We will reply within one business day.” Confirm the email arrived, and connect CRM if that is the destination you want.

What still needs the business, not more code

- **Published CAD prices** for Pricing cards (item 2), if you want numbers on the page.
- **Named client quotes** and live Clutch / Trustpilot / Google URLs (items 4–5).
- **Real case studies** with client, industry, and a result (items 12–13, 36).
- **Registered Canadian legal name** and a decision on the Calgary map pin (item 14).
- **Optional new service pages** for Web Development, App Development, Hosting (item 15).
- **PageSpeed pass** on the live domain (item 37).
- **Confirm Formsubmit → inbox / CRM** (item 39).

Those are marked GUIDED in the code so they can be restored without hunting.
